Reveal the true cost of your addiction. Stop funding the nicotine industry and watch, second by second, as your savings build your freedom.

The biggest obstacle to your financial independence might be your daily habit. The journey toward freedom begins the second you decide to face pure mathematics.

Nicotine addiction is more than just a dependency – it is a relentless wealth tax and a continuous transfer of capital from your pocket to someone else's control. Addiction Ticker is designed for those who want to see the truth through pure mathematics – whether you have already quit or are just considering starting your journey.

This is not a typical motivational app. It is a clinical financial auditing tool that transforms every second into a real-time vision of your lost or accumulated capital.

FULLY DATA-DRIVEN – YOUR NUMBERS, YOUR REALITY

The app adapts completely to your personal situation. Input your data, and the mathematical model generates an uncompromisingly objective analysis:

- Your precise quitting or starting time
- Your daily expenditure and estimated price increases (inflation and taxes)
- Your expected return from the investment markets

CORE FEATURES:

- TWO MODES: Are you "Hooked" or "Free"? The app shows live, second-by-second, either the money you are burning or the pure cash savings since your start.

- REAL-TIME TRACKING: Experience the growth of your savings or the accumulation of your losses in a kinetic interface that updates in fractions of a second.

- THE POWER OF COMPOUND INTEREST: Dynamically see the opportunity cost: the value your money could reach if invested in the stock market over decades.

- DATA-DRIVEN NOTIFICATIONS: Forget empty "good job" messages. Receive device-generated notifications that tell you exactly, to the second, your accumulated sum and its future investment potential.

- ADJUSTABLE INTENSITY: Choose how often you need a reality check. Whether you want an overview only at major milestones, every morning and evening, or by selecting the relentless "Intense" mode that delivers cold facts every single hour.

- SHARE YOUR RESULTS: Share your accumulated savings achievements or current situation with friends at the touch of a button and challenge them to face their own numbers.

- COMPLETE PRIVACY: No cloud sync, no accounts, and no backends. All your financial data is processed locally on your device. You alone control your data and decide what to share.

GLOBAL SUPPORT

The interface and financial tracking algorithms are designed for an international audience:

- Supported languages: English, Finnish, Spanish, German, French, Italian, and Portuguese.
- Supported currencies: USD, EUR, GBP, CAD, AUD, NZD, CHF, BRL, and MXN.

Your strategy for breaking free from nicotine is now numerically measurable. When motivation is no longer based on emotions but on hard data, the decision becomes easier.

Stop funding the nicotine industry. Start building your own financial freedom.

## Ratings & Reviews

This app hasn't received enough ratings or reviews to display an overview.

## What's New >

Version 1.4
Apr 21
